# Systems Design Engineering

#### **EXPERIENCE**

### Software Engineering Intern, Elastic.io

Bonn, Germany 05/2019 - 08/2019

- Increased quarterly revenue by 10% through automating sales leads by developing RESTful CRM (Zoho, Pipedrive) API modules
- Analyzed customer feedback and enhanced elastic.io API to optimize customizable integration flows and white-labeling for 200+ clients
- Identified platform improvements to stakeholders through customer interviews and translating their concerns into technical specifications

# Software Engineering Intern, Sprout

Toronto, Canada 09/2018 - 12/2018

- Increased customer retention by 70% by deploying Google & Facebook
   Single Sign On Authentication (SSO) on the Sprout onboarding process
- Collaborated with the product manager to roadmap the development and release of the "Delete Account" feature for 4 million mobile users
- Built and refactored RESTful APIs by utilizing test driven development to reduce technical debt while improving query performace by 40%

# Co-Founder, Azure Online Solutions

Toronto, Canada 04/2016 - Present

- Consulted digital marketing strategies to support long-term growth for local businesses
- Led brand awareness campaigns and reach analysis for clients leading to partnerships, marketing specifications and online prominece
- Audited existing processes and leveraged automation tools such as Hootsuite and Sprout, saving 500+ hours yearly

# Software Engineering Intern, Maple Leaf Foods

Toronto, Canada 01/2018 - 04/2018

- Conducted behavioural analysis on factory workers to define the product specs for the downtime data collection flow within factories
- Reduced the time to record downtime data in factories by 90% through deploying a Swift app that migrates data collection from paper to iPad
- Initiated a team transition into a structured Agile/Scrum environment by leading daily standups and Kanban practices

#### **SKILLS**

#### **Product**

Usability Testing • User Research Data Analysis • Deployment

#### Development

JavaScript • C++ • Python • PHP Swift • SQL • HTML/CSS

#### Tools/Frameworks

Node.js • React Native • Git • Figma

#### **PROJECTS**

#### Director of Outreach

Managed and led first year Engineering mentorship program for 1700 students

### Valkyrie Labs (Swift, ARKit)

Pitched the MVP of an AR suite which was adopted by German stakeholders

#### Stamina (JS, HTML/CSS)

Google Chrome Extension that reminds user to take breaks

#### **EDUCATION**

# University of Waterloo

09/2017 - Present

Systems Design Engineering Minor in Cognitive Science

#### Relevant Courses:

Human Factors in Design, Probability and Statistics, Data Structures and Algorithms

#### **INTERESTS**

Running • Sports Analysis • Philosophy
Data Security • Culture • Exploring
